

AMENDMENTS TO THE SPECIFICATION

Please insert the following heading on page 1 at line 3:

BACKGROUND OF THE INVENTION

Please replace the heading on page 2, line 23 with the following rewritten heading:

SUMMARY DISCLOSURE OF THE INVENTION

Please replace the paragraph at page 5, line 4, with the following rewritten paragraph:

According to the above arrangement, the apparatus setting section accepts an input by a first operator, and performs the at least one of the connection setting between the apparatus and the apparatus controlling device, and the operation confirmation including the test run of the apparatus using the apparatus controlling device, and the network setting section accepts an input by a second operator different from the first operator, and performs the connection setting between the apparatus controlling device and the server. The setting status monitoring section monitors the apparatus setting status representing whether the setting by the apparatus setting section has been completed, and the network setting status representing whether the setting by the network setting section has been completed. The setting status display section displays the apparatus setting status and the network setting status detected by the setting status monitoring section.

Please replace the heading on page 8 at line 3 with following rewritten heading:

DETAILED DESCRIPTION OF BEST MODE FOR CARRYING OUT THE
INVENTION

Please delete the heading on page 59 at line 1:

EXPLOITATION IN INDUSTRY
